Jabberwocky

Lewis Carroll

'Twas brillig, and the slithy toves
Did gyre and gimble in the wabe;
All mimsy were the borogoves,
And the mome raths outgrabe.

“Beware the Jabberwock, my son!
The jaws that bite, the claws that catch!
Beware the Jubjub bird, and shun
The frumious Bandersnatch!”

T_EX, *ΛT_EX*, and Beamer

T_EX is a programming language for the typesetting of documents. It was created by Donald Erwin Knuth in the late 1970s and it is documented in *The T_EXbook* [1].

In the early 1980s, Leslie Lamport created the initial version of ΛT_EX, a high-level language on top of T_EX, which is documented in *ΛT_EX: A Document Preparation System* [2]. There exists a healthy ecosystem of packages that extend the base functionality of ΛT_EX; *The ΛT_EX Companion* [3] acts as a guide through the ecosystem.

In 2003, Till Tantau created the initial version of Beamer, a ΛT_EX package for the creation of presentations. Beamer is documented in the *User's Guide to the Beamer Class* [4].
